

Andre Parker, Web Developer

Seattle, WA | 253.468.2061 | ajparker000@gmail.com | <https://github.com/ajparker00> |

Objective

I am highly self-motivated Web Developer who spends most of his time building applications. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as time passes. Web Development has offered an engaging challenge to continually learn and improve my skills in creating high-quality software.

Technical Skills

HTML, CSS, Sass, Bootstrap, JavaScript, jQuery, ReactJS, React Native, Redux, Rest APIs, JSON, Node.js, Express, MongoDB, Babel, Codepen, VSCode, Postman, Version Control (GitHub), NPM, Yarn, SEO, Google AdWords, Google Analytics, hosting and deployment, Netlify, GitHub pages, PostgreSQL and SQL, Heroku

Projects

MULTI USER GAME-PRESS YOUR LUCK

- **Description:** This game allows two users to alternate turns rolling a die to see who can reach the #21 first, but it will not be easy. If a player goes over the #21 that player must start over.
- **Project Overview:** Successfully implemented program logic along with testing for website to ensure the sites effectiveness thru DOM manipulation.
- **Environment:** vanilla JavaScript, CSS3 and HTML5 (no libraries)

LOVE AND KINDNESS

- **Description:** It's a website for Loving Kindness Family Counseling Services. A counseling service that is 100% committed to helping people find the extra help they need in a non-judgment, compassionate environment.
- **Project Overview:** Integrated Bootstrap framework as the skeleton but include additional CSS & Sass for styling. In addition I incorporated google icons as well as jQuery for the modal.
- **Environment:** Bootstrap 4, Sass, CSS3, jQuery
Website: <https://ajparker00.github.io/love-kindness/>

ROBOFRIENDS

- **Description:** This app allows you to search for a robot from the collection of robots available on the page.
- **Project Overview:** Completed the Front End life cycle process with the focus of engineering dynamic components, integrating a 3rd party API for the robots as well as using a 3rd party library for styling.
- **Environment:** ReactJS, 3rd party Library (Tachyon), Public API (Robohash.org), Netlify

SMART BRAIN

- **Description:** This Application allows you to pick an image off of the internet, place the JPG, PNG file in the search bar. At that point you hit detect, the application will then detect all of the faces and puts a square boarder around them.
- **Project Overview:** Created a single-page React app on the frontend, working on a custom node server. App will have 3 view routes and 3 custom endpoints for fetching data, sorting data and clearing data.
- **Environment:** ReactJS, Redux, Custom routes and endpoints for API, Netlify
